DETAILED ACTION

Election/Restrictions

1. Applicant's election of Species I (Claim 13) in the reply filed on 7/12/2005 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).
2. Claims 14-16 have been withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected 14-16, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 7/12/2005.

Specification

3. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.
4. The following title is suggested: A METHOD FOR MANUFACTURING AN ACOUSTIC MATCHING MEMBER.
5. Applicant is reminded of the proper content of an abstract of the disclosure.

A patent abstract is a concise statement of the technical disclosure of the patent and should include that which is new in the art to which the invention pertains. If the patent is of a basic nature, the entire technical disclosure may be new in the art, and the abstract should be directed to the entire disclosure. If the patent is in the nature of an improvement in an old apparatus, process, product, or composition, the abstract should include the technical disclosure of the improvement. In certain patents, particularly those for compounds and compositions, wherein the process for making and/or the use thereof are not obvious, the abstract should set forth a process for making and/or use thereof. If the new technical disclosure involves modifications or alternatives, the abstract should mention by way of example the preferred modification or alternative.

Art Unit: 3729

The abstract should not refer to purported merits or speculative applications of the invention and should not compare the invention with the prior art.

Where applicable, the abstract should include the following:

- (1) if a machine or apparatus, its organization and operation;
- (2) if an article, its method of making;
- (3) if a chemical compound, its identity and use;
- (4) if a mixture, its ingredients;
- (5) if a process, the steps.**

Extensive mechanical and design details of apparatus should not be given.

6. The abstract of the disclosure is objected to because the abstract is not drawn to the claimed invention. i. e. method Correction is required. See MPEP § 608.01(b).

Claim Rejections - 35 USC § 102

7. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

8. Claim 13 is rejected under 35 U.S.C. 102(b) as being anticipated by Moller (US 4,579,658).

As applied to claim 13, Moller discloses a method comprising the step of: (a) filling voids of a porous member (11, Fig. 1) with a fluid filling material (curable liquid substance) whose volume after solidification is not less than a volume of the voids of the porous member; and (b) solidifying the fluid filling material inside of the voids and the surplus fluid filling material at the same time (column 3, lines 43-55).

Conclusion

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
